PROFESSIONAL SUMMARY

5+ years in IT operations — high-volume helpdesk at Blibli (30+ tickets/day, 95%+ resolution rate), then asset management and end-to-end SAP procurement for 4,000+ devices at BSS. Works well in fast-paced environments where data accuracy is not optional.

WORK EXPERIENCE

PT Bina Sarana Sukses

Jakarta, Indonesia

IT Operations

Jun 2025 – Feb 2026

- Conducted routine physical inspections on laptops, PCs, and mini-PCs; corrected records on the spot when device condition did not match what was logged in the system.
- Managed procurement end-to-end: verified request completeness, coordinated management sign-off, submitted PR to logistics and PO to procurement, and followed through to asset handover with BAST — all tracked in AMS and SAP (PR/PO/GR).
- Inspected incoming devices against PO specifications before registering them in AMS and assigning asset numbers.
- Handled helpdesk tickets alongside asset duties — troubleshoot hardware, software, and network issues for office users daily.

PT Global Digital Niaga (Blibli)

Jakarta, Indonesia

IT Technical Support Helpdesk

Aug 2022 – Dec 2024

- Handled 30+ tickets per day via OTRS and closed the majority within SLA — consistently, across 500+ users.
- Maintained a 95%+ resolution rate with most issues resolved without escalation.
- Performed L1/L2 troubleshooting across enterprise applications, hardware, and network — from login issues to connectivity faults.
- Supported partial onboarding for new staff by completing setup missed by the onboarding team: VPN, Microsoft Office, Remote Desktop, SAP, and other enterprise applications so users could get to work without delays.
- Documented recurring issues and their resolutions in the ticketing system so the team was not starting from scratch each time the same problem appeared.
- Escalated tickets exceeding helpdesk scope to the infrastructure team; kept handovers clean so nothing fell through the cracks.

PT Sunindo Kookmin Best Finance

Jakarta, Indonesia

IT Support & Development Staff

Nov 2020 – Jul 2022

- Managed Active Directory for 200+ employees — account creation, access control, and changes for joiners, movers, and leavers.
- Handled day-to-day IT operations: shared drives, printers, and LAN — components that affect the whole office when they go down.
- Maintained and customized SQL queries for weekly operational reports delivered to management; output in Excel, sourced from an internal leasing system covering customer transactions from registration through to contract printing.
- Set up hardware, software, and network devices for new and existing staff.

EDUCATION

Universitas Negeri Jakarta

Jakarta, Indonesia

Bachelor of Electrical Engineering (S1 Teknik Elektro) | GPA: 3.41 / 4.00
